---

Thanks for your prompt response. I don't think a phone conversation would add anything useful to me.

Mr. Green,

We did not object to the Hanford permit. I have spent some time looking into the issue you raised to me by email during our 45-day review period. Will you be available for a phone conversation tomorrow? I'd like to discuss that topic with you if possible.

Mr. Hardesty,

Did EPA object to the issuance of Hanford's Title V permit (Renewal 2, Revision B)?

It is my understanding EPA's 45-day review period concluded at the close of business yesterday, July 25, 2016.

Mr. Green,

We received the Hanford proposed Title V permit (Renewal 2, Revision B) from Ecology on June 10, 2016, for our 45-day review. As you know, if we do not object to the issuance of the permit during that 45-day period, Ecology can proceed with issuance. The 60-day petition period begins at the end of our 45-day review period, on July 26, 2016.

Regarding your question emailed to Region 10's general email address, most permit authorities in Region 10 email proposed Part 70 permits to me. If the permitting authority mails the proposed permit to Region 10, as Ecology did the Hanford permit, we generally receive those in our air program in Seattle.

Please let me know if you have any questions.

**Subject:** Title V (Part 70) Permit Tracking

June 21, 2016

Mr. Hardesty and Mr. Meyers:

I understand one or both of you are the Region 10 Air Permits Team Contact for Title V permit tracking questions. I'm interested in learning whether Region 10 has received the proposed Hanford Site Air Operating Permit (AOP) renewal, permit number 00-05-006 Renewal 2, Revision A, B, or C. Region 10 could have received this proposed permit from the Washington State Department of Ecology any time after March 1, 2016.

Has Region 10 received the proposed Hanford Site AOP renewal since March 1, 2016? If so, on about what date was this proposed permit received?

Thank you in advance.

Bill Green
